Editorial 1

Subject Index

ACTH
– effect on electrical activity of brain 188
– secretion, regulation of 72, 188, 235
Adrenocortical secretion, effect of age on 175
Adrenocorticoid biosynthesis, circadian rhythmicity of 207
Age
– effect on FSH secretion 30
– effect on pineal calcification 41
– effect on stress response 175
Amino acid transport in median eminence 123
Amygdala, role in ovarian compensatory hypertrophy 228
Androgen sterilization 349

Brain
– catecholamine synthesis in 100
– LH receptors in 149
– monoamine content of, in human fetus 257
– norepinephrine concentration in 65
– RNA content and topography 285
– unit activity in, effect of ACTH on 188
– –, effect of pseudopregnancy on 2
– –, effect of stress on 215

Castration
– effect on hypothalamic metabolism 133
– influence on brain catecholamines 100
Catatoxic steroids 316
Catecholamines in brain, effect of pituitary hormones on 100
Cervical stimulation, effect on unit activity of brain 2
Circadian rhythmicity
– of adrenocorticoid biosynthesis 207
– of pineal-subcommissural organ system 267
Cold response, regulation of 158
Corticoid secretion
– cold exposure and GH release 58
– feedback regulation of 235

Dexamethasone
– blockade following diencephalic isolation 72
– suppression of stress response 175, 215
Diencephalic isolation, effect on stress response 72, 215
Dihydrotachysterol, effect on TSH secretion 142
Dopamine in human fetal brain 257

Ergocornine, effect on brain catecholamines 100
Estrous cycle, effect on FSH secretion 30

Fatty acid metabolism, neuroendocrine regulation of 365
Fetal TSH 197
FSH, regulation of secretion 20, 30
FSH-RF 30

Glucose tolerance, central neural regulation of 83
Glycogen storage, central neural regulation of 83
Gonadotrophins
– feedback control 228
– regulation of secretion 304
Growth hormone secretion, effect of cold exposure on 58

Haloperidol, effect on prolactin secretion 332
Hypothalamus
– electrical activity of, effect of LH on 149
– electrical activity of, effect of stress on 215
– function of, effect of pinealectomy on 244
– implantation of dihydrotachysterol in 142
– implantation of testosterone in 20
– implantation of testosterone propionate in 349
– lesioning of, effect on puberty 297
– metabolism of 133
– monoamine content of, in human fetal tissue 257
– neurosecretion in, influence of pineal on 358
– RNA content of 285
– role in ACTH secretion 188
– unit activity of, effect of pseudopregnancy on 2

Insulin sensitivity, central neural regulation of 83

L-cystine-aminopeptidase, effect of sex hormones on 321
LH
- regulation of secretion 341
- sensitive receptors, localization in brain 149
Light-induced persistent estrus 244
Limbic system, role in ovarian compensatory hypertrophy 228

Median eminence
- implantation of testosterone in 20
- LH receptors in 149
- metabolic activity of 123
Melatonin, physiologic role 51
Microsomal enzyme inducers 316
Mitosis in epidermis, neuroendocrine regulation of 267

Neurosecretion in hypothalamus, effect of pinealectomy on 244
Norepinephrine
- concentration in brain 65
- concentration in human fetal brain 257

Olfactory bulbs, effect on insulin sensitivity 83
Ovarian compensatory hypertrophy, mechanism of 228
Ovulation, effect of hypothalamic lesions on 297

Parathyroid hormone, effect on cold response 58
Pentobarbital, suppression of cold response by 158
Pineal
- calcification of, incidence in Nigeria 41
- effect on hypothalamic function 244
- function, regulation of 278
- implantation in hypothalamus 358
- -subcommissural organ system 267
Pituitary
- -adrenal function, following diencephalic isolation 72
- adrenal function, regulation of 235
- function, maternal-fetal interactions 197
- hormones, effect on brain catecholamines 100
- implantation of testosterone in 20
Plasma unesterified fatty acids, neuroendocrine regulation of 365
Prolactin
- effect on brain catecholamines 100
Prolactin
- regulation of secretion 304
- secretion, effect of haloperidol on 332
- secretion, effect of light on 278
Propoxyphene intoxication 316
Pseudopregnancy, effect on electrical activity of brain 2
Puberty
- effect of hypothalamic lesions on 297
- effect on norepinephrine concentration of brain 65

RNA content in various brain areas 285

Serotonin
- effect on hypothalamic metabolism 133
- in human fetal brain 257
Sex, effect on pineal calcification 41
Sex hormones
- effect on hypothalamic metabolism 133
- effect on L-cystine-aminopeptidase 321
Sexual maturation, effect of hypothalamic lesions on 297
Stress
- effect on adrenocorticoid biosynthesis 207
- effect on growth hormone secretion 58
- -free rats, thyroid function of 158
- response to, effect of age on 175
- response to, following diencephalic isolation 72, 215

Testosterone, effect on FSH secretion 20
Testosterone propionate, implantation in hypothalamus 349
Thyroid
- function, effect of dihydrotachysterol on 142
- function, in stress-free condition 158
- function, maternal-fetal interactions 197
- hormone, effect on cold response 58
TRF, synthetic, effect on cold response 158
TRH
- effect on fetal TSH secretion 197
- labeled, half life of 250
- metabolites of 250
TSH secretion, effect of dihydrotachysterol on 142
Tubero-infundibular dopamine neurons 100

Vaginal opening, effect of hypothalamic lesions on 297

– binding 218
Eye opening 183

Feedback 71, 246
–, thyroxine 197, 273
FSH implants, hypothalamic 161

Gland, pineal 46, 121
Glucocorticoids 371
Gonadotrophin 53, 325
– – releasing factor 338
– secretion 301
Grafts, ectopic hypophyseal 83
Growth 121
– hormone 31, 58, 309
Guanethidine 155

Hormone, antidiuretic 1
–, growth 31, 58, 309
–, luteinizing 175, 309, 338, 358
–, melanocyte-stimulating 235, 257
–, thyroid 58
Hypertrophy, compensatory adrenal 139
–, – gonadal 161
Hypogonadism 183
Hypothalamic FSH implants 161
– cuts 31
– nuclei 1
– stimulation 175
Hypothalamus 23, 53, 71, 155, 183, 197, 207, 218, 235, 257, 316, 325, 338, 349
– neonatal 94, 109
Hypothyroidism 183

Implants, thyroxine 183
Indoles 139
Inhibition, tyrosine-hydroxylase 282
Inhibitor, dopamine-β-oxidase 155
Integrated blood collection 349
Intermediate lobe, pituitary 235
Intraventricular injection 261

Isolation 371

Karyometry 23

Lesions, electrolytic 301
–, irritative 301
Levodopa 309
LH 261, 349
LH-RH 53, 261
Light conditions 46, 121
Liver 94
Lobe, intermediate pituitary 235
–, posterior pituitary 257
Luteinizing hormone 175, 309, 338, 358

Mammillary peduncle 316
Maturation, sexual 121
Median eminence 71, 207, 282, 358
Melanocyte-stimulating hormone 235, 257
Melatonin 139
Metabolism, GH 31
6-Methylthiouracil 58
Metrazol 94
Multiple-unit activity 358

Naso-anal length 31
Neonatal hypothalamus 94, 109
Neonates 183, 197
Neurogenic stimuli 316
Neurosecretion 1
Norepinephrine 155, 207, 325

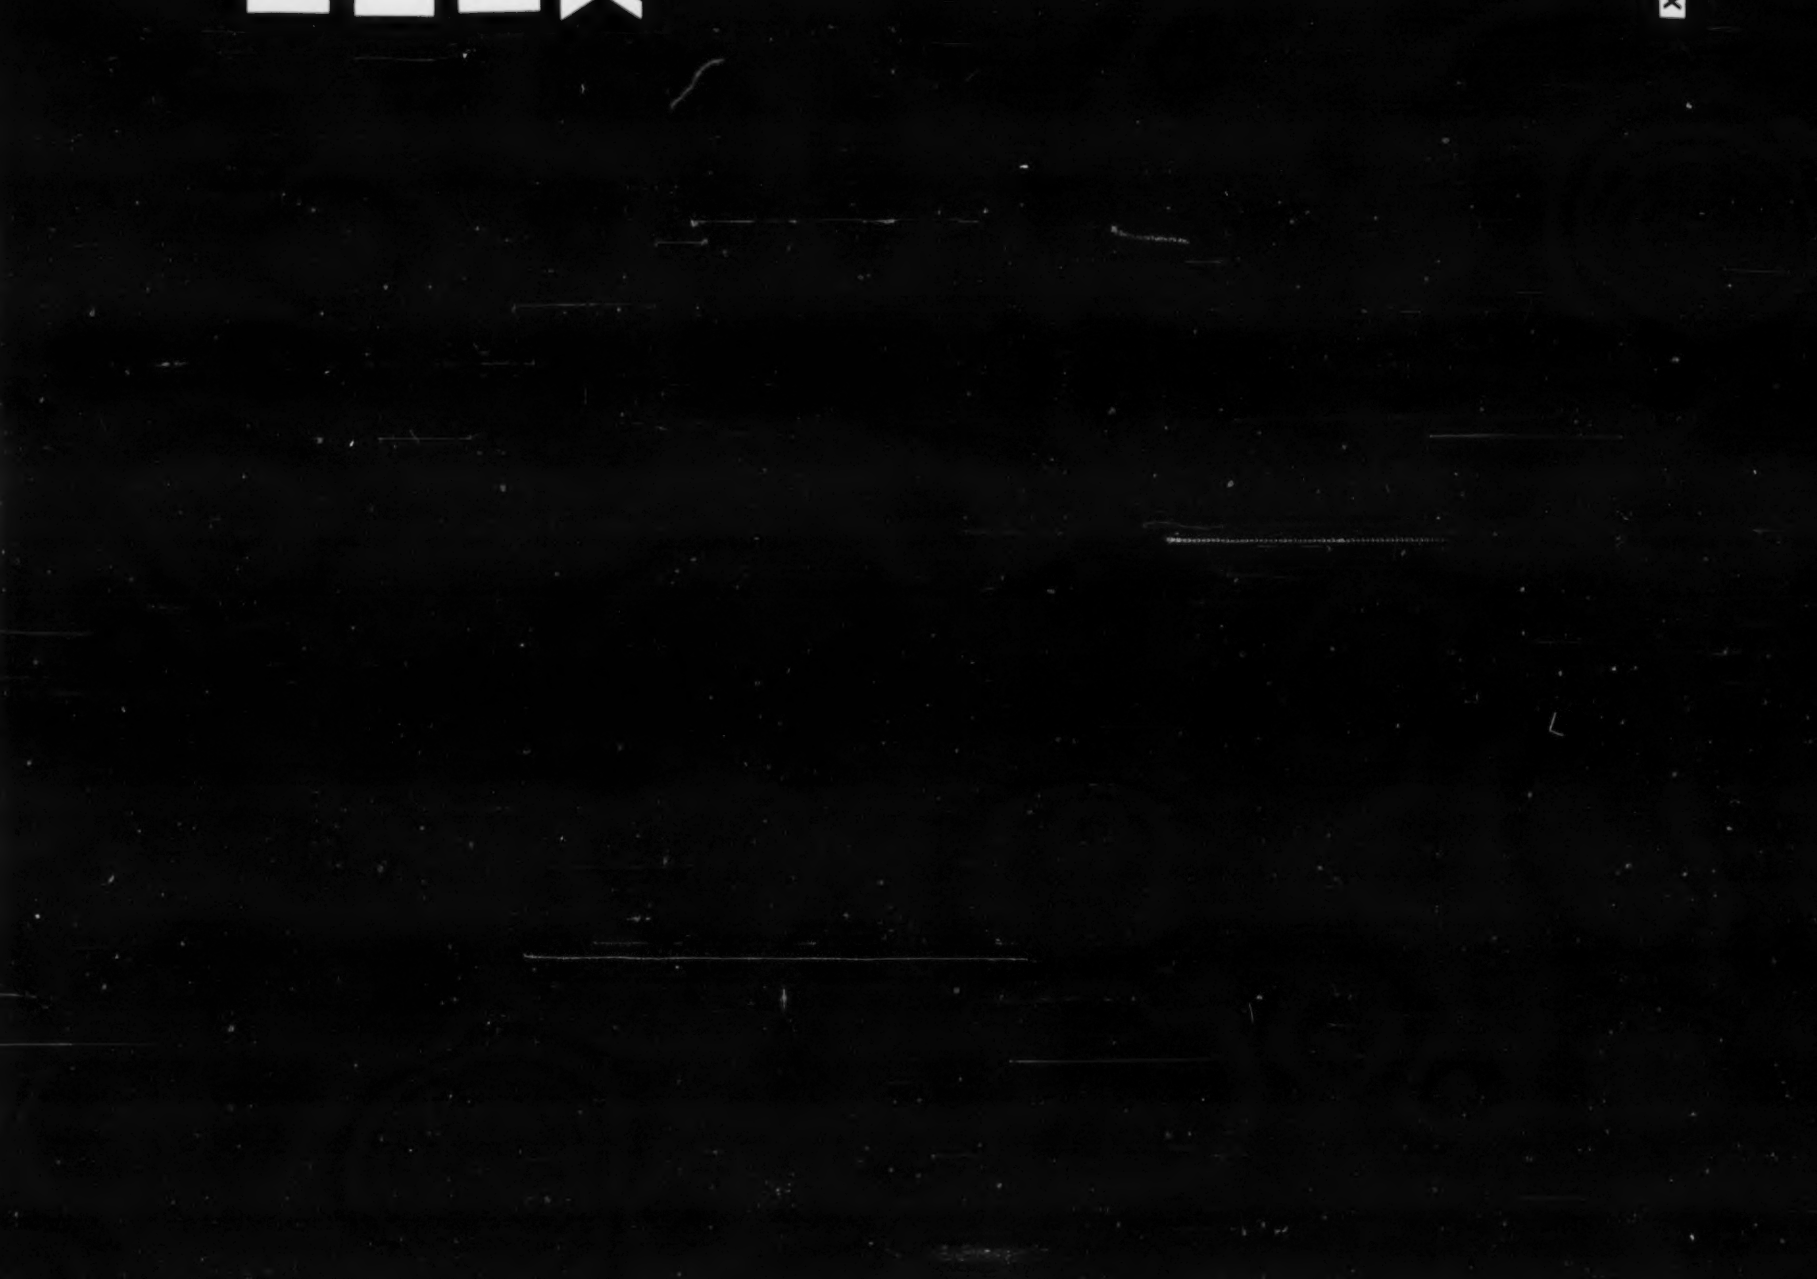
Osmotic stress 1
Ovulation 338
–, reflex 358
–, synchronization 338

Peduncle, mammillary 316
Pentobarbital 94
Phenoxybenzamine 129
Pinealectomy 139
Pineal gland 46, 121
Pituitary 46, 53, 218, 257, 338, 349
– stalk 257
– transplant 273
Plasma, growth hormone 31
–, testosterone 229
Preoptic area 197, 358
Progesterone 175, 338
Prolactin 349
Propranolol 129
Protein synthesis 109
Puberty 121
–, early 301

Radioimmunoassay 349
Receptor · estrogen complex 218
Reflex ovulation 358
Renal nerves 129
Renin 129
Reserpine 235

Secretion, gonadotrophin 301
–, TSH 197
Sexual maturation 121
Stalk, pituitary 257
Sterility 94
Stimulation, hypothalamic 175
–, vaginal 358
Stimuli, neurogenic 316
Stress 246
–, cold 139
–, osmotic 1
Superovulation 282

Testosterone 161, 282
–, plasma 229
Thyroid 207
– hormone 58
Thyroparathyroidectomy 58
Thyroxine feedback 197, 273
– implants 183
– transport 71
Transfusion, cross 261
Transplant, pituitary 273
Transport, thyroxine 71
TSH 46, 71, 273
– secretion 197
Tyrosine-hydroxylase inhibition 282

Unilateral adrenalectomy 139


Vaginal stimulation 358
